## Successful Trade Fair Presentation of ATMOVA convinces at the Viennese Trade Fair "*Bauen & Energie*"

The ATMOVA system, the energy-supplying solution that values aesthetics and design, was again able to attract widespread attention at the well-visited trade fair in Vienna with 50,000 attendees. "Through talks with professional visitors and potential customers, we managed to acquire premium professional contacts with substantial interest in collaboration for entering the Austrian market", reports Philippe Michel, the Head of Sales at Swissmetal Design Solutions AG. The audience of professionals is primarily awaiting the upcoming entry of the ATMOVA system into the Austrian market.

The positive response at the CEP in Stuttgart, the first trade fair presentation of ATMOVA, saw its continuation in Vienna and is already now emphasising the increasing acceptance of ATMOVA as a monovalent heating system that highly values design.

The next presentation of ATMOVA will take place from 10 - 14 March 2009 at the Frankfurt trade fair "ISH", the world's leading fair for the bathroom experience, building, energy, air-conditioning, renewable energies. The ATMOVA system will present itself in Hall 9.0, booth D 04.

Founded in 2007 as a subsidiary of Swissmetal, Swissmetal Design Solutions AG develops and distributes a novel form of energy extraction. ATMOVA offers architecturally appealing roof and façade elements in an adjustable total system which integrates in already existing roof and facade constructions in a seamless fashion. In this way, ATMOVA combines aesthetics and modern heat extraction as a renewable energy. The positive physical characteristics of a special copper alloy make it possible for ATMOVA system to make energy from the environment available and to use a heat pump for heating and hot water for buildings (for additional information on ATMOVA, please see [www.atmova.ch](http://www.atmova.ch)).

Swissmetal produces and sells worldwide high-quality special products made of copper and copper alloys which are mainly used in the electronics, telecommunications, air travel, petroleum, automobile, stationery and watch/clock industries and in the architectural sector. In financial year 2008, Swissmetal achieved turnover of CHF 325.1 million. As at end of January 2009, the company had 672 full time-employees. Swissmetal, with its registered office in Dornach (Switzerland) is quoted on the SIX Swiss Exchange as Swissmetal Holding Ltd.
