## **ATMOVA, a unique, copper-based energy and design concept, plans its market entry in 2009**

The original idea of extracting energy from the environmental temperature of buildings was first presented to the public in November, 2007. Since then, the system was developed to be able to introduce to the market, and the market introduction was prepared under the new brand name of "ATMOVA". The test installations with ATMOVA roof tiles successfully passed their tests. The ongoing measurements show especially encouraging test results. The complete efficiency level of heating on the basis of the ATMOVA system is quite high, and brings promising market opportunities in combination with its design aspects. This can be reinforced many of the current and concrete demands.

ATMOVA offers architecturally appealing roof and facade elements in an adjustable total system which integrates the roof and facade constructions in a seamless fashion. ATMOVA combines esthetics and modern heat extraction as renewable energy. The positive physical characteristics of the special copper alloy make it possible for ATMOVA to make energy from the environment available and to use a heat pump for heating and hot water (for additional information about the functional capabilities of ATMOVA, please see [www.atmova.ch](http://www.atmova.ch)).

The first official showing of ATMOVA will take place at the CEP (Clean Energy Power) exhibition, the international exhibition for renewable energy and passive housing, at the exhibition facilities of the new Stuttgart Congress Center, from January 29 to January 31, 2009. The ATMOVA system will be presented to the public in Hall 9 on booth B09.

Swissmetal produces and sells worldwide high-quality special products made of copper and copper alloys which are mainly used in the electronics, telecommunications, air travel, petroleum, automobile, stationery and watch/clock industries and in the architectural sector. In financial year 2007, Swissmetal achieved turnover of CHF 407.0 million. As at end of December 2008, the company had 685 full time-employees. Swissmetal, with its registered office in Dornach (Switzerland) is quoted on the SWX Swiss Exchange as Swissmetal Holding AG.
